## Overview

The Avantis Barclays Volatility Control Index (the "Index") aims to provide exposure to profitable firms priced at good value and to the U.S. Treasuries for a 10% risk budget using techniques of Modern Portfolio Theory. The building blocks that make up the portfolio are: Equities (Avantis U.S. Quality Large Cap Index) and Treasury Futures (US 2Y, US 5Y, US 10y).

Please also refer to the product literature for the Security Benefit Life Insurance Company annuity offering an index account based on the index.

The chart presents the change in the index value for the selected period; an individual cannot invest directly in an index. The change in the index's value shown in the chart does not reflect the caps, spreads, trigger rates, and/or participation rates that would have applied to an index account in a fixed index annuity that determined interest credits based in part on the change in the index's value. Past performance of the index is no guarantee of, and should not be relied upon as a predictor of the future change of the index's value.

Annuities are issued by Security Benefit Life Insurance Company in all states except New York.
